Bengaluru, Karnataka, India | +91 8088833875 | vishalgowdask65@gmail.com | [LinkedIn](#) | [GitHub](#) | [LeetCode](#) | [Portfolio](#)

EDUCATION

Ajeenkya D Y Patil University (Newton School Of Technology) B-Tech in Computer Science and Engineering
Specialisation in AI/ML – CGPA: 7.32/10

EXPERIENCE

AI/ML Intern, Smarta Tech

June 2026 - Present

- Designed and implemented a **concurrent, asynchronous request-handling architecture** for calls to LLM APIs, cutting pipeline latency and improving throughput for production inference workloads.
- Owned a **production ML pipeline** end-to-end - data collection, data mining, preprocessing, model development, and evaluation - for a real-world AI application, taking it from prototype to deployment.
- Architected a **retrieval system** integrating vector databases with LLM APIs to improve context relevance and accuracy of generated responses for downstream applications.
- Collaborated directly with stakeholders to **translate business requirements into data-driven solutions**, using systematic feature engineering and experimentation to improve model performance.

Founder & Lead, MediConnect (Startup)

2025 - 2026

- Led a 5-person founding team building a healthcare connectivity platform, from product design through to a competitive pitch process, a platform where we wanted to digitalise the medical industry.
 - I was responsible for the workflow, planning, milestone management, team management, analysing the problems that might come in future and getting the team prepared well in advance.
 - We had advanced to the final round of an investment stage shark pool.
-

PROJECTS

House Price Prediction

June 2026

[GitHub](#) | [Live Demo](#)

- Built an end-to-end ML system in Python (Scikit-learn, Pandas, NumPy) covering data preprocessing, feature engineering, model training, and deployment.
- Benchmarked Linear Regression, Random Forest, and XGBoost; **XGBoost performed best** ($R^2 \approx 0.41$, RMSE $\approx ₹1.71L$), outperforming the linear baseline by capturing non-linear interactions between property features that Linear Regression couldn't model.
- Deployed a Streamlit application enabling real-time property price predictions for end users.

Smart Store

April 2026

[GitHub](#) | [Live Demo](#)

- Built a responsive e-commerce frontend in React with authentication, protected routes, and form validation.
 - Designed global state management with Context API and reusable components to optimise UI performance and maintainability. Full-stack and SQL database soon.
-

TECHNICAL SKILLS

Core CS: Data Structures & Algorithms, Object-Oriented Design, Concurrency & Asynchronous Programming, Software Design

Languages: Python, C++, JavaScript, HTML, CSS

Frameworks & Libraries: React, Node.js, Express.js, FastAPI, Pandas, NumPy, OpenCV, Matplotlib, Seaborn

Cloud & DevOps: Azure, Docker, Git/GitHub, GitHub Actions, Virtualisation

AI / ML: Machine Learning, LLMs, RAG, Hugging Face, OpenAI API, MCP

APIs & Tools: REST APIs

CERTIFICATIONS

Claude Code With The Anthropic API — Anthropic March 2026

- Implemented RAG pipelines, MCP integrations, and advanced prompting techniques using the Anthropic API to build context-aware AI applications.
